

Skælskør Lystskov

6 Now we pass through the EU bird protection area in an exciting common landscape in Furer Forest. After this we go into Gerdrup Forest. Please follow the small arrows which mark the allowed traffic in the forest!

7 The tour back to the old steam mill in Vestergade can go through the tunnel and over Nytorv through Algade and directly to Vestergade 1.

Traffic can only be on foot and only on the trail/path marked with arrows. Traffic is only allowed between sunrise, earliest at 7 am, and sunset.

-It is not allowed to camp

-Traffic is at your own responsibility

-You can under no circumstances bring dogs

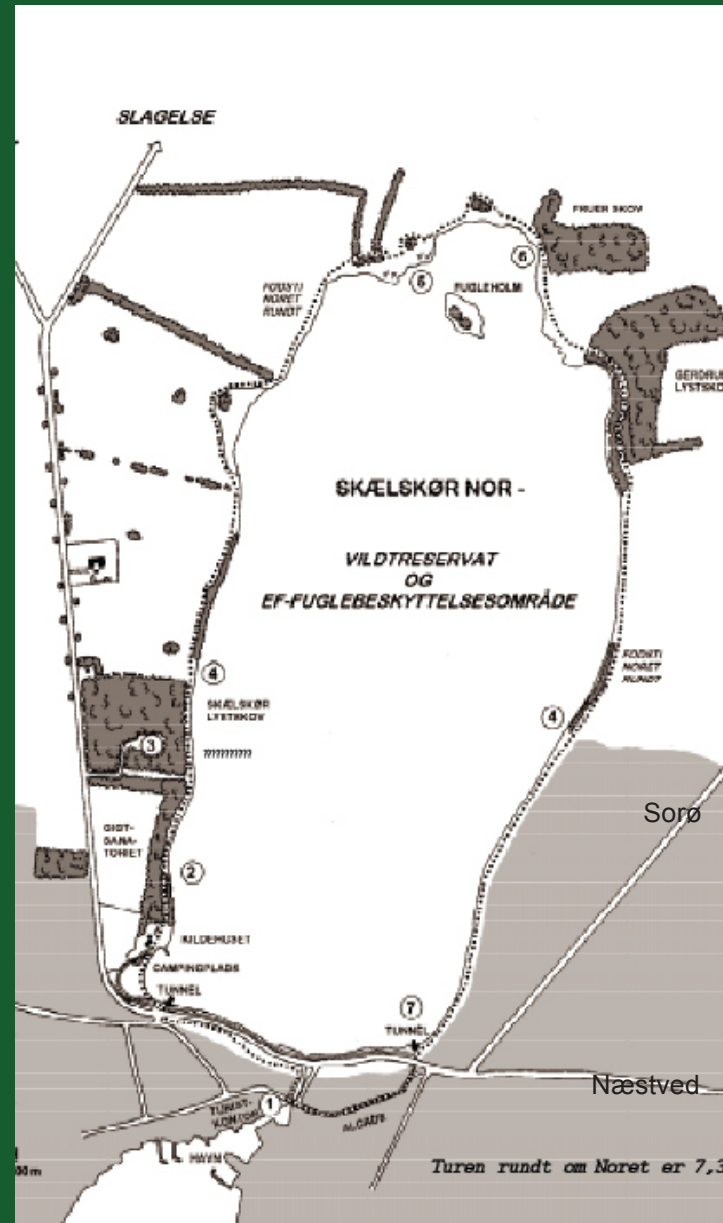

-Open fire is not allowed

-Do not throw garbage in the nature

Map of Skælskør cove

The path can in periods be difficult to pass due to dense growth and high water

Prepared in a cooperation between Slagelse Kommune and Denmark's National Trust, Skælskør Local Committee, April 2004

Stamping Path around Skælskør cove

Route length: 7,3 km

For the hikers, with passage through forest and the EU bird protection area

Skælskør Lystskov

Experience Slagelse commune along the path which go around the cove. You pass through both forest and the EU bird protection area.

1 The tour starts from the old preserved steam mill from 1853 in Vestergade 1 by the harbour. (The tour can also start from point 3 in Skælskør Forest). Follow the Westside of the canal and turn left just before Norvejen. Follow the path and turn right through the tunnel and see the Nor appear.

2 To the left you can get a glimpse of the Rheumatic sanatorium, a beautiful piece of functionalistic architecture from the 1930's. The park is open for a small detour for those interested in gardens.

3 The tour can also start from the parking lot in the middle of Skælskør Forest. In 1997 a hostel was built here – on the same spot where once lay a restaurant that burnt down in 1980. It is a public forest and you are therefore allowed everywhere in the forest.

4 Here starts the new foot path along the Nor, which the plot owners voluntarily have made accessible for the public. Remember to obey the rules for traffic so that we in the future still can enjoy the tour around the Nor.

5 Across the tidal meadow you can see the small island of Fugleholm which belongs to Gerdrup Manor, and which therefore is private property. The row of stones in the water could have been a part of a fixed link to the island. A more interesting idea could be that it is remains from a loading site for the rich settlement that was situated near Boeslunde in the late Iron Age and in the Viking Age – the period from the year 600–1000.
